"Having a cat gives us the opportunity to feel like a guest in our own home" That is what the author claims. But let us not be fooled. A cat will not host us saying: "whatever I've got, you're welcome to it" or propose the most comfortable chair. Nothing like that! Living with it under the same roof, though interesting, is full of challenges and continuous fight for the place at your own home.

What about the phenomenon of a cat, since "it has no practical applications?" The answer can be found in this hilarious book. What distinguishes it from typical guides, is a remarkable sense of humour manifested not only in word, but also in the mentioned situations, and finally - the author's distance to himself and, of course, to cats.

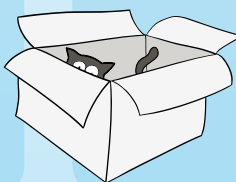

Those who have never had a cat may find a part of the content unclear, unintelligible, and, even worse, funny. But only to the first cat. Then things change dramatically and emotions of a different category appear (...)

You may wonder whether it makes sense to give your cat a name as it never comes when you call it. On the other hand, most cats respond to any name, provided that the caller is located in the kitchen.

The examples of names for cats with difficult personalities can be as follows: Talon, Satan, Tornado, Ripper, Butcher, Thug, Anguish or Fury (for female cats).

If you want to do something nice for your cat, do not buy him special houses and wind-up mice - bring it a box. An ordinary cardboard box.
